

Dr. John Xiong named leader of Haley & Aldrich’s emerging contaminants practice

Description

Burlington, Mass., Nov. 12, 2019 – Haley & Aldrich announced today that [Dr. John Xiong](#), Ph.D., P.E., will lead its [Emerging Contaminants practice](#). In this role, Xiong, located in Haley & Aldrich’s Costa Mesa office, will lead the company’s efforts to develop and provide innovative technical solutions for emerging contaminants such as [per- and polyfluoroalkyl substances \(PFAS\)](#), 1,4-dioxane, 1,2,3-trichloropropane (TCP), perchlorate, and inorganic contaminants such as chromium, molybdenum, and lithium.

“We are very pleased to have Dr. John Xiong lead our Emerging Contaminants group at Haley & Aldrich,” said Murray Einarson, Haley & Aldrich’s Contaminated Site Management Service Leader. “John is well known for his technical knowledge about a broad range of emerging contaminants. He is a seasoned consultant who imparts a clear vision for solving our clients’ most pressing environmental challenges.”

Xiong has designed and implemented a wide range of innovative and traditional soil and groundwater remedial systems, including nanoscale zero valent iron, enhanced bioremediation, in situ chemical oxidation, permeable reactive barriers, in situ biogeochemical transformation, soil vapor extraction, dual phase extraction systems, monitored natural attenuation, and pump-and-treat systems.

He has been a Principal Investigator for two government-funded research projects and published 13 peer-reviewed technical papers on his work. He also holds two patents on technologies for in situ treatment of inorganic contaminants.

He is on the Board of Directors of the Southern California Chinese American Environmental Protection Association (SCCAEPA), a nonprofit organization serving the environmental scientific community and the Chinese-American community in Southern California.

Xiong has a Ph.D. in Environmental Civil Engineering from Auburn University, as well as B.S. and M.S. degrees in Environmental Engineering from Chongqing University.
