Guidance and implementation manual for ANSI/ASSP Z10

The American National Standards Institute (ANSI) and The American Society of Safety Professionals (ASSP) have published a Guidance and Implementation Manual for ANSI/ASSP Z10. The Z10 is an occupational health and safety standard that is similar to the International Organization for Standardization (ISO) standard 45001. This manual's purpose is to help organizations understand various approaches to implementing both standards.

Haley & Aldrich's Corporate Health & Safety Manager Danyle Hepler served on the ANSI/ASSP Z10 Standard Committee as well as the Editorial committee that authored and reviewed the manual.

To purchase a digital copy of the manual for \$74.95 or \$59.95 for members, visit the [ASSP website](#).

You can also purchase a [digital version of the Z10 standard](#) itself for \$125 or \$110 for members.
